Website Hosting Plans

Hosting a website with headoffice is easy and affordable. Our simple “**One Plan**” package offers a complete All-in-One hosting solution with plenty of disk space, bandwidth and additional features. Unlike other companies, we do not offer multiple choices because too many choices invariably mean you are offered limited features in all but the highest-priced option.

“One Plan”

At headoffice, we have a comprehensive corporate package that includes everything you would need to establish your corporate website and operate an online business. Other hosting providers may offer similar plans, but none offers the amount of storage and traffic that we do.

headoffice has the *perfect hosting solution* for companies at about Tk. 22.00 a day (payable annually). For a calculated monthly rate of about Tk. 667.00, you’ll get our simple “**One Plan**” package—an all-in-one hosting plan. No hidden fees, no unexpected add-ons, and no missing features: our plan has everything you need, with lots of disk space and ample bandwidth, plus a full range of reliable services. (See below for details.)

Our “**One Plan**” is hosted by North American servers, with guaranteed 99.99% uptime, data security and lightning-fast access times.
